WRITING

Time: 30 minutes

Express your opinion on the following quotation:

"Education is a progressive discovery of our own ignorance."

Will Durant (U.S. historian)

Write 150 -200 words.

Remember to

- make an introduction,
- express your personal opinion on the problem and give reasons for your opinion,
- make a conclusion.

Now I have read the quotation of Will Durant that "Education is a progressive discovery of our own ignorance." Let's I have an opinion about that.

I should say that I mostly agree with this quotation. Education is long and hard process which could take about the whole life. But, education is a process which ^{can} ~~could~~ broaden up our horizons. We can understand many things we needed but ignored them. And more we study more we see our ignorance. But, it can be argued. Many people who has good education just ignore problems that they can help to fight with. So, it depends on the person who is getting an education. But, never the less. We all do mistakes. And education will show you this mistakes and will help you with them. The more you know the less percent of doing something silly.

~~Summed up all this~~ Summed up all this, I am ready for the conclusion. "I agree with this quotation. Education is really helps us find out our ignorance. It helps us not only find mistakes, but also teaches us how to solve them."
