Essay

Nowadays, a lot of people are changing their places of living and their jobs several times during their lives. In my essay I will try to say if it is good or not.

In my opinion it is a positive development because when you change your place of living you study the culture of the place to which you have moved. Also, when people change their jobs and start working in another sphere people develop themselves in this way.

Other people claim that the idea of mixing cultures in this way is not good. It is like that there will be no clear cultural group.

I cannot agree with point of view because the person who has decided to change his place of living usually has a family, so he will not harm the blood cleanness in that region. Also, the cultural groups which want to prevent themselves from disappearing usually are closed ones.

Today people are changing their places of residence and careers several times. Some people claim that it is good and people develop themselves in this way and others think that it harms to the cleanness of cultural groups. I think that it is not dangerous at all and it is a positive development.
