A lot of people change their jobs and places of living during their lives nowadays. I would like to think about reasons of this events, it's positive and negative sides. 30

So, there are a lot of spheres of industry and economics during the period in what we live! Most countries develop all over the world constantly. Every-year people change many things for their life, for example medicine and laws. The world is developing. This is a main reason for me. It turns out, some professions become old-fashioned. People need to change their careers. The other reason is that students ^{too} don't plan their life exactly. They don't know where they want to study, live and so on. Teens think that future life is not important and then get into troubles. Also people can leave one place for the other because of their health. 143

It's difficult to separate this decisions to good and bad. For one it is good and for other it's bad. It is fortune. But I think it is necessary to develop. And to be honest I'm afraid of the future.

In my opinion person can change everything in his life if he really want or need to do it. 202
