Part 4

I think that elderly people who live alone should be taken care of, because many of them can't do it by themselves.

For the ^{firstly} first they live alone, so that kind of people needs to do everything by themselves but in many ways ~~it~~ it is difficult for them, because elderly people can be ill.

Also if they are alone, that means that they have nobody to talk to because ~~they~~ their relatives may be dead or too far from them.

In some countries there are technologies that analyses household sounds to ensure safety of such people, but not in every ^{one}.

In my opinion this problem must be solved in the nearest future.
