Elderly people who live alone should be taken care of

isutipolaine  
 Elderly people who live alone should be taken care of, because they also need a help, care and love. They need to communicate with somebody.

I think, when they live alone they need all these stuff too. Or, maybe, some systems or technologies, which will look after them and analyse household sounds to ensure their safety. why?

For example, Fujitsu has developed the new sound monitoring system, which examines noises via a microphone connected to a data centre. Also some technologies are refined enough to differentiate between the sound of a falling object or a collapsing human.

Therefore, elderly people just won't be able to survive without any help such as human beings or technologies.
