Part 4.

The first libraries appeared in Europe, because it is useful for people. They can go to the libraries and have knowledge about all over the world. I sometimes go to the school libraries to take books for summer reading. In modern libraries you can take books free for one month or read inside the libraries. I think that future libraries will be very technological. There are exclusive books and electronic books, so the future libraries will be small. My dear readers, read more books and go to the libraries it help you to be smart and very interesting person! I think that phones, TV and other electronic influence in our people and they go to the libraries very seldom. Read more, dear friends! 123 words
