I am going to write an essay about the length of holidays and terms. This question is rather popular nowadays, as many people think that children have got too much free time.

In the one hand I suppose that it is bad for learning as during the summer holiday students forget the school programm and also they avoid repeating it. So when they come back to school the first term is spent for remembering materials. In the other hand school is really complicated for many children. Holiday is a way to have a rest for them. Moreover, scientists said that children need to have more free time or time spending on different activities not to have a psychological diseases.

How I said earlier, holidays are children's time. They can do everything they want. Some people said that leisure activities are useful too. They can develop our science, artistic part and feel great. They are swimming, drawing, sculpturing, playing the computer etc. I suppose that school holidays are important for our new generation.

The main reason people would like to make holidays shorter is that students do a lot of silly things. Many years ago children worked with their families during the holidays, ~~so~~ <sup>therefore</sup> it was like a real job without school and ~~studies~~ homework.

In the end, I would like to say that terms are long enough for learning new material and children want to have enough time for themselves. ~~And~~ I strongly believe that they can do.?
