Nowadays education all over the world is known to be very difficult for students. They spend much time doing the homework and preparing for the lessons. Students's brain is always ^{under} ~~in~~ the stress, ^{therefore} ~~so~~ they need to have time for relaxing from the learning. By this reason I suggest that having ⁵¹ long summer holidays is better than having longer terms. Firstly, in summer ^{it} is good and warm weather, thus, students can spend time outside improving their health. Secondly, they can also enjoy walking with friends and being with their family, that is rather difficult to do while learning. Thirdly, ¹⁰⁰ when they get enough strength (physical and mental) they can begin studying better. But on the other hand, there is the fact that students can not go through their educational problem. But for solving this problem all educational systems should be changed. If terms are longer, students will lose their motivation to study and get knowledge, because of the too hard pressure on their brain. ¹⁶⁵

In my opinion the best leisure on holidays is mixing of relaxation, walking and studying. I believe that students are expected to do some exercises on holidays not to lose their knowledge and skills. And they really should do it, because it is important to keep ^{their} brain fit and not to forget about school or university ²³³ information ^{they} you have got before, in the previous school year.

In the end I would like to say that the most important thing in people's life is health, so students should take care of themselves and not run out of their possibilities, achieving the goal of excellent studying. ²⁷⁶
