In Russian schools students have summer holiday every year. A lot of kids and teens think that summer holiday is too short. Should they really have a longer holidays.

For studying is better long terms. Students will have much more time to study.

In American schools students don't have any summer holidays. But if terms will be longer, ~~students~~ studying will be harder and students will be bored.

During summer holidays, students may explore their knowledges, they can book extra lessons to learn something new or revise school lessons to make their marks better. On your holidays you can go to math lessons if you don't well at math. But don't waste your time only for studying. During holidays you need to relax. Relaxing and a little bit studying make holidays better.

To make terms longer school can make studying process easier. Students will learn easier.
